

Product Name: Solar Mate III Part Number: SM1802 –Solar Technology

Brief Description: Solar Mate is a lighting kit in a box! Where mains quality lighting is needed in remote locations, such as workshops, stables, summer houses, garden offices, garages, sheds etc Solar Mate is the answer.

Catalogue Description: Solar Mate addresses the problem of illuminating remote areas where no mains power exists. Exempt from Part P of the Building regulations, Solar Mate can be easily and safely installed by anyone. Solar Mate's solar panel will collect enough energy during the course of the day (even in Britain) to power its bulb for between 8 and 11 hours every day of the year (8 hours in the winter - 11 hours for the rest for the year). Solar Mate has a 10 year warranty so will easily pay back its investment many times. Solar Mate II will illuminate 32square metres.
