

Magnoball™ Softens Water And Prevents Limescale - Ecozone

Both economical and environmentally safe, Magnoballs's magnetic power crystallises Limescale particles in the water, preventing them from settling in your clothes or clogging up the heating elements and pipes of your washing machine or dishwasher. You should find you no longer need anti-limescale tablets to soften your water, you'll use around 70% less detergent and you can even lower the washing temperature and still get your clothes or dishes clean. Suitable for use in all washing machines and dishwashers and with all detergents, may be used along with our popular Ecoballs®. Just place the Magnoball™ in the machine and wash as normal. Lasts for up to 10 years, magnets carry a manufacturer's 5-year guarantee.
